This is Technocracy, which was defined in The Technocrat magazine in 1937:

Technate org chart, Technocracy Study Course, 1934. In one full sweep, Technocracy intends to replace all politics, all economics, and all religion within its scientific dictatorship.

Historically, everybody saw through Technocracy and showered it with hate. Even the Communists, Marxists and Fascists hated them. – TN Editor

Schwab's blunt language shows globalists are no longer hiding their agenda, if only people would listen and take them seriously. But they know most are zombies no longer able to think for themselves.

World Economic Forum founder and director Klaus Schwab, speaking at the WEF's recently concluded summer meeting in China, has informed his elitist followers that ushering in the globalist agenda will require humanity to be "forced" into a "collaboration" with the unelected organization. And the time for forced collaboration *has now arrived*.

Schwab made the declaration during his opening remarks at the WEF's Annual Meeting of the New Champions, also known as the "Summer Davos," in Dalian, China.

He praised China for its economic policies, which are seen by the globalists as the model of top-down centralized planning in a high-tech surveillance state run through smart cities, smart EVs, smart homes, smart appliances, smart meters, and AI, digital IDs and CBDCs, all of which hold one thing in common — they come with on-off switches not under the control of the end user, which is we the people. In their ideal

Schwab stated:

"To drive future economic growth we must embrace innovation and force the collaboration across sectors, regions, nations, and cultures to create a more peaceful, inclusive, sustainable, and resilient future. At this critical juncture the active participation of all stakeholders is essential to ensure a sustainable development path."

Of course the biggest stakeholders of all, those paying taxes to fund governments, have no seat at the table in Schwab's elitist meetings. And that's by design. We are seen by these globalist predators as useless eaters, part of a herd that needs to be culled in order to preserve global resources for themselves. Speaking like a true Malthusian, Schwab said "**we must force humanity into collaboration**" with the WEF schemes to depopulate the planet under the guise of climate change.

Watch the **video clip** where Schwab touts the so-called "Fourth Industrial Revolution technologies" such as artificial intelligence. This is why they don't need as many of us on the planet as in the past. AI will perform most of the tasks for the elites. They don't need as many human slaves.

WEF : Klaus Schwab 'We Must Force' Humanity into 'Collaboration'

Limits to Growth is the title of a key globalist tome published by the Club of Rome in 1972. One of the co-authors, Dennis Meadows, said six years ago in an interview that the world's population must be reduced from the current 8 billion down to 1 or 2 billion. Meadows said he hopes this massive depopulation could be done in a "peaceful way."

Dennis Meadows Interview p1/4 (The Limits to Growth, Climate Change, Population)

been from day one, and because he has become senile to the point where his globalist handlers are no longer able to hide it, they are ready to replace him with a new puppet. The new puppet will look prettier and speak smoother, but he/she will no more be in charge of his or her actions as president than Biden has been.
